

Black Stone Fly On English Bait Hook

By: Don Privett

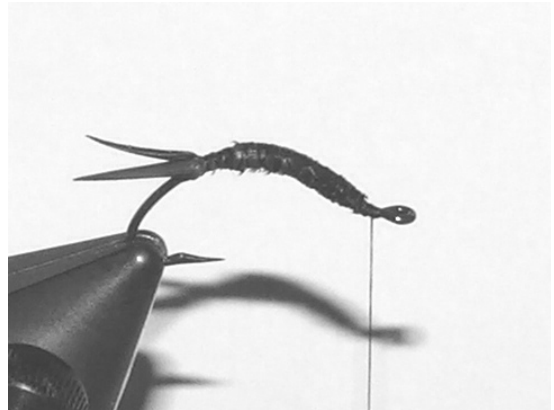

Hook: Mustad 37160
Thread: black 6/0
Weight: .015" lead
Tail: 2 black Goose biots

Rib: black ultrawire
Body: UV Black Ice Dub
Thorax: Same ice dub as body, picked out
Wingcase: Goose wing feather

1. Start the thread behind the eye and wrap to hook point. Then wrap .015" lead from behind eye to hook point. Overwrap with thread and build a small ball behind lead..

2. Tie in 2 black Goose biots for the tail using the thread ball described in step 1 to hold the biots apart to form the split tail.

3. Apply dubbing to thread and wrap body forward. Then counterwrap wire rib forward and tie off behind the eye of the hook.

4. Dub thorax and tie in Goose wing feather to form wing case. Build a large thread head and whip finish.
